Dear MYSA Soccer Families,

We hope this message finds you well. Over the past 72 hours, we have encountered several changes regarding our soccer complex parking situation. Following meetings with the city and local businesses, the City has decided to implement parking restrictions on the Midwestern Industries side of the street. New signage was installed on April 20.

Moving forward, parking will be permitted on the field side of the street; however, we advise against this option due to safety concerns. In previous instances, small children have been in dangerous proximity to vehicles, posing significant risks. Therefore, we urge you to closely supervise your children while walking near parked cars.

Please be aware that parking on the grass is strictly prohibited, and all vehicles must remain on the road. Parking on the grass other than in designated areas could result in your vehicle being towed or ticketed. Additionally, it is important to remember our soccer complex is private property, not city-owned.

Please do not block entries to businesses, marked fire lanes, parking areas or park within 9feet of the fire hydrant and 15feet of the corner at the end of each street.

We have expanded our parking lot, now identified at the top of the complex, which is a 0.3-mile walk to the farthest point on Field 1. We are also planning to add another parking area in the near future.

MYSA remains committed to prioritizing safety and transparency with our community. We assure you that we have not involved law enforcement or towing services regarding parking issues; complaints and calls originated from local businesses.
